### Fleckenfreie Nutzung

A drip grid with a drip tray underneath prevents unwanted stains and damage to the floor from dripping off disinfectant.

Modern aesthetics meet functional design with high quality processing of galvanized sheet steel with the seal of approval Made in Germany.

### Intelligenter Sensor

An intelligent sensor ensures contactless hand disinfection with an optimally calibrated spray head, which atomizes the hand disinfectant liquid so finely that no unnecessary drops are created.

The tower works with a rechargeable lithium-ion battery pack and is therefore mobile applicable. Optionally, the disinfectant dispenser can also be connected via a power supply unit.

### Stauraum & Schloss

The tower can be filled with a 1L canister via a rear panel and is also lockable. If necessary, an external hose enables connection to larger containers.

The disinfectant dispenser can be attached to the floor with four screws and can therefore be used excellently on any floor.
