

PRESS RELEASE

**NEW - FIRST STERILE FFP2 HEALTH MASK
IN GERMANY FOR THE USE
IN THE MEDICAL ENVIRONMENT**

Hamburg, December 9th, 2020 - With the first sterile FFP2 respirator that is approved for use in a medical environment, the Hamburg based company CAPULUS Medical Services is delivering a new product that is so far unique in Germany. The 5-layer respirator made in the UK creates a particle filter of 97 percent, is still comfortable to wear and allows optimal breathing. The first respiratory protection mask to be approved with ISO 13485: 2016 certification is ideal protective equipment, especially for protection in professional areas such as in the health and care industry as well as food companies. The treatment with ethylene oxide (EO) during the vacuuming process makes the individually welded masks absolutely sterile. The sterile FFP2 masks are the first of their kind on the European market and are ideal for medical use in wards, care facilities and food processing with high hygiene standards. The sterile FFP2 masks are packed in quantities of 10, 30 and 50 per outer box.

With a production capacity of approx. 5 million masks a month, the German company made a conscious decision in favor of an innovative European manufacturer in order to be more independent from the Asian market and to be able to guarantee customers a faster supply chain. With a weekly stock of 200,000 masks, CAPULUS Medical Services offers plenty of retrievable storage quantities and can therefore act quickly even with individual customer requests.

The Hamburg company CAPULUS Medical Services specializes in holistic hygiene concepts for companies, in the import and export as well as the own production of CE / FDA certified medical accessories according to DIN 14683: 2019 + AC: 2019 such as face masks, hand and surface disinfectants with 80% organic ethanol, disinfectant & euro dispensers, sterile PP / SMS surgical gowns and protective suits, antigen rapid tests and infrared clinical thermometers.

Customers include Klinikverbund Bremen, Deutsche Post AG, Veltins, Caritas Oldenburg, Hufeland Klinikum, St. Bonifatius Hospitalgesellschaft, Argentum Group, Pflegediakonie Hamburg-West / Südholstein, Federsee Health Center, Eichsfeldkliniken, Benevit Group, Evac Train or world market leader Gelita AG.
