

PRESS RELEASE

NEW CAPULUS MEDICAL OFFER:

**HIGH PERFORMANCE AIR PURIFIER WITH
99,99 PERCENT EFFECTIVENESS AND
100 PERCENT REIMBURSEMENT BY ÜBERBRÜCKUNGSHILFE**

Hamburg, May 3rd, 2021 - The Hamburg PPE provider CAPULUS Medical Services is now selling the VITAPOINT® air purifier with HEPA H14 high-performance filter. This high-performance filter is made in Germany and removes viruses, bacteria, pollen and microparticles up to a size of 0.001 µm up to 99.995% from the air. On the one hand, this significantly reduces the risk of infection and, on the other hand, it leads to an enormous improvement in indoor hygiene. Despite the very high filter performance and an energy-saving motor, the VITAPOINT® is pleasantly quiet and its modern design makes it suitable for any room. Depending on requirements, freely selectable in design and color, it can be personalized with an individual motif print or a company logo. With the mobile version you can choose between five different models, which differ in fan and motor power, filter levels, design, control and the suitability of the room size. The filter performance is suitable for rooms from 45 to 300m², with polluted air being sucked off near the floor and hygienically clean air via a ventilation grille on the top of the device via two or even three filter levels (fine dust filter, HEPA H-14 filter, activated carbon filter / depending on the model) is returned to the room.

Good to know: Hygiene items (PPE) and air purifier can be reimbursed up to 100 percent by applying for Überbrückungshilfe III. This is particularly interesting for large companies and workplaces with a lot of people, public institutions, cultural institutions, as well as schools, restaurants, hotels, medical practices and retail. This design air purifier is therefore the ideal addition to a well-rounded hygiene concept and a safe alternative to ventilation measures that are not suitable for everyday use.

The VITAPOINT® 2000 is available from a price of € nt. 2,490.00 and will be delivered within Germany with a surcharge of € 80 net. The VITAPOINT® 6000 pro with a 5-stage timer, a 1.5 kW motor and multilingual display control, room air sensor and filter monitoring is suitable for large rooms up to 300 m² and costs from € nt. 17,250.00 supplemented by delivery costs within Germany of € nt. 180.00. Data sheets, brochures and product videos are now available for download from the website at www.capulus-medical.de.

The Hamburg company CAPULUS Medical Services specializes in holistic hygiene concepts for companies, in the import and export as well as the own production of CE / FDA certified medical accessories according to DIN 14683: 2019 + AC: 2019 such as face masks, hand and surface disinfectants with 80% organic ethanol, disinfectant & euro dispensers, sterile PP / SMS surgical gowns and protective suits, antigen rapid tests and infrared clinical thermometers.

Customers include Klinikverbund Bremen, Deutsche Post AG, Veltins, Caritas Oldenburg, Hufeland Klinikum, St. Bonifatius Hospitalgesellschaft, Argentum Group, Pflegediakonie Hamburg-West / Südholstein, Federsse Health Center, Eichsfeldkliniken, Benevit Group, Evac Train or world market leader Gelita AG.
